Looking for solutions for your personal computer or business systems?

We will help you...

Reduce paper forms.

Create a web presence.

Gather business data.

At Vaughan Family Enterprise Inc., we are here to offer you a solution that will meet your personal or business needs. From creating Custom Applications, Integrating Systems, or creating an Intranet site, we will help to make your business run smoothly.

Our clients include small businesses, large corporations, individuals, charitable organizations, and not-for-profit groups.

## SYSTEMS INTEGRATION

Integrate your day-to-day processes to reduce user entry errors, collect data, and streamline your overall operations from all departments with the installation of proper hardware and/or software into a system to become visible within your company.

### Systems Integration

## CUSTOM APPLICATIONS

Wish you could make decisions faster to better serve your customers?

A customized computer application allows you to reduce the paper trail and gather the correct information quickly and promptly.

### Custom Applications

## WEB PRESENCE

It is a known fact that most people check the internet as their first source of information. Put your product or service onto the world wide web so that billions of people can find you.

### Web Presence

By making your website visible on the internet, it becomes a means of advertising and generating new business from potential clients that you otherwise may never have reached.

## INTRANET SITES

An Intranet site is slightly different than an Internet site. The visibility of the information is directed solely to your employees and only available on the systems within your local network via a web browser.

From setting up and displaying schedules to gathering of report data, an employee is empowered to become part of the process from start to finish.
